Skills

Architecture: Microservices, Event-Driven Systems, Distributed Systems, RESTful APIs

Languages: TypeScript, Java, Python, SQL

Styling: TailWind, SASS, LESS

Frameworks: React, Spring Boot, Node.js, GraphQL

Cloud/DevOps: AWS, Docker, Kubernetes, Jenkins (CI/CD), Git

Testing & Quality: JUnit, Jest, SonarQube, Splunk

Databases: MySQL, PostgreSQL

Work Experience

Senior Full Stack Developer

Mechanicsburg, PA

Deloitte

May 2024 - Present

- Architected event-driven payroll microservices platform supporting enterprise-wide workforce transition; authored design standards adopted across multiple teams.
- Built React/TypeScript + Spring Boot system reducing processing time 70% and improving accuracy 90%.
- Implemented Jenkins-based CI/CD pipeline with automated testing (95%+ coverage) and Splunk monitoring, improving deployment efficiency 40%.

Senior Full Stack Developer

Washington, D.C.

The Messenger

May 2023 - February 2024

- Architected scalable React/TypeScript + GraphQL news platform serving 10M+ monthly users.
- Defined frontend standards and authored design docs adopted across distributed team.
- Increased ad revenue 45% via monetization infrastructure integration.

Senior Full Stack Developer

Washington, D.C.

Grid News

December 2021 - April 2023

- Owned AWS-hosted Node.js/Python microservices architecture with React frontend serving 8M+ users; designed event-driven publishing workflows for scalability.
- Established engineering standards and drove cross-team technical alignment.
- Automated 75% of editorial workflows via Python tooling.

Full Stack Developer

Greenbelt, Maryland

ASRC Federal

June 2017 - December 2021

- Designed backend APIs and optimized MySQL schemas supporting NASA programs.
- Automated data workflows improving system efficiency and reliability.

Education

BSc Grove City College, Computer Science

Grove City, PA
